**Note:**

Figures presented in statistical appendices refer to those released up to the end of March 2007. Readers wishing to obtain current statistical information on Hong Kong are invited to visit the 'Hong Kong Statistics' section of the Census and Statistics Department's website ([www.censtatd.gov.hk/hong\\_kong\\_statistics/index.jsp](http://www.censtatd.gov.hk/hong_kong_statistics/index.jsp)). The section is updated regularly and it also provides hyperlinks to relevant government websites for facilitating retrieval of other official statistics of Hong Kong.

**Special Note:**

\*\* The Population By-census conducted in July to August 2006 provides a benchmark for revising the population figures compiled since the 2001 Population Census. Population-related figures from 2001 to 2005 have been revised accordingly.

Notes: Figures in brackets refer to percentage changes over the same period of the preceding year.

Gross National Product (GNP) is a measure of the total income earned by residents of a country or territory from engaging in various economic activities, irrespective of whether the economic activities are carried out within the economic territory or outside. GNP is obtained by adding net external factor income flows (i.e. external factor income inflow *minus* external factor income outflow) to GDP of the same year.

- (1) A Balance of Payments (BoP) account is a statistical statement that systematically summarises, for a specific time period, the economic transactions of an economy with the rest of the world. A complete BoP account comprises (a) current account; and (b) capital and financial account.
- (2) In accordance with the Balance of Payments accounting rules, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit. For the capital and financial account, a positive value indicates a net capital and financial inflow and a negative value indicates a net outflow. As increases in external assets are debit entries and decreases are credit entries, a negative value for net change in reserve assets represents a net increase and a positive value represents a net decrease.
- (3) The estimates on net change in reserve and non-reserve assets under the Balance of Payments framework are transaction figures. Effects from valuation changes (including price changes and exchange rate changes) and reclassifications are excluded.
- (4) In principle, the net sum of credit entries and debit entries is zero. In practice, discrepancies between the credit and debit entries may however occur for various reasons as the data are collected from different sources. Equality between the sum of credit entries and debit entries is brought about by the inclusion of a balancing item which reflects "net errors and omissions".

Consumer Price Index (C)	-1.5	+0.8	+2.2
Food	-0.2	+1.0	+1.8
Housing	-2.8	§	+5.1

Notes: (1) The year-on-year rate of change in the Consumer Price Index (CPI) is an indicator of inflation affecting consumers.

(2) The CPI(A), CPI(B) and CPI(C) respectively cover some 50%, 30% and 10% of households in Hong Kong. The average monthly household expenditure (in HK\$) of these groups during the base period (i.e. Oct. 2004-Sep. 2005) were \$4,000–\$15,499, \$15,500–\$27,499 and \$27,500–\$59,999 respectively. Taking into account the impact of price changes since the base period, the monthly household expenditure ranges of the CPI(A), CPI(B), and CPI(C) adjusted to the price level of 2006 are broadly equivalent to \$4,100–\$15,800, \$15,800–\$28,200 and \$28,200–\$61,500 respectively, and that of the Composite CPI is broadly equivalent to \$4,100–\$61,500. The Composite CPI is compiled based on the expenditure patterns of all these households taken together.

(1) A service domain differs from a service industry in that it comprises those economic activities straddling different industries but are somehow related to a common theme. For instance, tourism includes all activities of all hotels and travel agents; and some (those involving visitors as customers) but not all of the activities of restaurants, retailers and transport operators.

(2) Part of the data are obtained from the Hong Kong Tourism Board.

Notes: The coverage of commodities by end-use category has been slightly revised. Therefore, some figures in this table may be different from those presented in earlier editions of this publication.

- (1) Retained imports refer to those imported goods which are retained for use in Hong Kong rather than being re-exported to other places. The value of retained imports is derived by subtracting the estimated import value of re-exports from the value of imports. The former is obtained by removing an estimated re-export margin from the value of re-exports.

Notes: Figures refer to the first working day of June of the year.

The definitions of regional headquarters and regional offices have been revised as from 2006 to enhance the clarity of description. It should therefore be noted that figures for regional headquarters and regional offices for 2006 may not be strictly comparable with those before 2006.

Prior to 2005, figures refer to the country/territory where parent companies are incorporated. As from 2005, figures refer to the country/territory where parent companies are located.

In the case of a joint-ventured regional headquarters or regional office in Hong Kong, there may be more than one country/territory of its parent company(ies).
