Notes: Figures in brackets refer to percentage changes over the same period of the preceding year.

The entire data series of GDP has been revised following the completion of a technical exercise by the Census and Statistics Department in September 2012 to incorporate the latest international statistical standards as stipulated in the United Nations' *System of National Accounts 2008* in the GDP compilation framework of Hong Kong.

Trade in goods and services statistics are compiled based on the recommendations made in the *System of National Accounts 2008*, except the one on adopting the change of ownership principle in recording goods sent abroad for processing and merchandising.

As an interim arrangement, another set of trade in goods and services statistics, compiled based on the *System of National Accounts 2008* including the aforesaid change of ownership principle is published in the supplementary tables of the *Gross Domestic Product* report for reference. For details about the concepts, definitions and related compilation methods of the change of ownership principle, please refer to the *Special Report on Gross Domestic Product* published in September 2012.

(1) Accommodation services cover hotels, guesthouses, boarding houses and other establishments providing short-term accommodation.

Notes: Figures in brackets refer to percentage changes over the same period of the preceding year.

The entire data series of GDP and GNI have been revised following the completion of a technical exercise by the Census and Statistics Department in September 2012 to incorporate the latest international statistical standards as stipulated in the United Nations' *System of National Accounts 2008* in the GDP compilation framework of Hong Kong, and those stipulated in the International Monetary Fund's *Sixth Edition of the Balance of Payments and International Investment Position Manual* in the compilation of external primary income flows figures.

GNI (formerly known as Gross National Product (GNP)) is a measure of the total income earned by residents of an economy from engaging in various economic activities, irrespective of whether the economic activities are carried out within the economic territory of the economy or outside. GNI is obtained by adding net external primary income flows (ie external primary income inflow *minus* external primary income outflow) to GDP of the same year.

(1) Real Gross National Income (RGNI) is obtained by adding the terms of trade adjustment and real net external primary income flows to real GDP.

Notes: The entire data series of BoP has been revised following the completion of a technical exercise by the Census and Statistics Department in September 2012 to incorporate the latest international statistical standards as stipulated in the International Monetary Fund's *Sixth Edition of the Balance of Payments and International Investment Position Manual* in the BoP compilation framework of Hong Kong.

- (1) BoP is a statistical statement that systematically summarises, for a specific time period (typically a year or a quarter), the economic transactions of an economy with the rest of the world (ie between residents and non-residents). A complete BoP account comprises two broad accounts: (a) the current account; and (b) the capital and financial account.
- (2) In accordance with the accounting rules adopted in compiling BoP, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit. In the capital and financial account, a positive value indicates a net financial inflow while a negative value indicates a net outflow. As increases in external assets are debit entries and decreases are credit entries, a negative value for the reserve assets represents a net increase while a positive value represents a net decrease.
- (3) The estimates of reserve and non-reserve assets under the BoP framework are transaction figures. Effects of valuation changes (including price changes and exchange rate changes) and reclassifications are not taken into account.
- (4) In principle, the net sum of credit entries and debit entries is zero. In practice, discrepancies between the credit and debit entries may occur for various reasons as the relevant data are collected from many sources. Equality between the sum of credit entries and that of debit entries is brought about by the inclusion of a balancing item which reflects net errors and omissions.

Year-on-year Rates of Change in the Consumer Price Indices

Consumer Price Index (C) ⁽¹⁾	+2.7	+5.1	+4.1
Food	+4.4	+6.2	+5.1
Housing	+3.8	+6.7	+6.1

Notes: The year-on-year rate of change in the Consumer Price Index (CPI) is an indicator of inflation affecting consumers.

Figures are derived based on the 2009/10-based CPI series. The year-on-year rates of change before October 2010 were derived using the index series in the base periods at that time (for instance the 2004/05-based index series), compared with the index a year earlier in the same base period.

- (1) The CPI(A), CPI(B) and CPI(C) respectively cover some 50%, 30% and 10% of households in Hong Kong. The average monthly household expenditure (in HK\$) of these groups during the base period (ie Oct 2009–Sep 2010) were \$4,500–\$18,499, \$18,500–\$32,499 and \$32,500–\$65,999 respectively. Taking into account the impact of price changes since the base period, the monthly household expenditure ranges of the CPI(A), CPI(B) and CPI(C) adjusted to the price level of 2012 are broadly equivalent to \$5,000–\$20,500, \$20,500–\$36,000 and \$36,000–\$72,900 respectively, and that of the Composite CPI is broadly equivalent to \$5,000–\$72,900. The Composite CPI is compiled based on the expenditure patterns of all these households taken together.

Notes: Figures are as at end of the year.

(1) Figures refer to the rates per 1,000 population.

(2) Figures include all hospital beds in Hospital Authority hospitals, private hospitals, nursing homes and correctional institutions, which follow the coverage of the Hospitals, Nursing Homes and Maternity Homes Registration Ordinance, Cap. 165, Laws of Hong Kong.

(3) Figures include only hospital beds in Hospital Authority hospitals and private hospitals excluding accident and emergency observation beds, day beds and nursery beds, which follow the definition of the Organisation for Economic Co-operation and Development (OECD).

(4) Figures refer to the doctors/dentists with full registration on the local and overseas lists.

(5) After full implementation of the Chinese Medicine Ordinance, Cap. 549, Laws of Hong Kong, all Chinese medicine practitioners (CMPs) should be registered before they can practise Chinese medicine in Hong Kong. Any person who wishes to be a registered CMP should have satisfactorily completed an approved undergraduate degree course of training in Chinese medicine practice, taken and passed the Licensing Examination.

(6) CMPs with limited registration are allowed to perform clinical teaching and research in Chinese medicine in the specified educational and scientific research institutions. The registration period of CMPs with limited registration should not exceed one year and they cannot engage in private practice with patients.

(7) Listed CMPs can practise lawfully in Hong Kong under the transitional arrangements for registration of CMPs until a date to be announced by the Secretary for Food and Health in the Gazette. Listed CMPs may become registered CMPs through direct registration, registration assessment or licensing examination during the transitional arrangements.

(8) Figures refer to registered nurses and enrolled nurses.
